

World Class Testing Facility

Europe's Premier Fastener and Gasket Solutions Provider

17025 Accredited Laboratory

LoneStar Fasteners Europe operate a fully controlled quality system ensuring full traceability of our products, from initial supply source, into our manufacturing and distribution facility and right through to customer despatch.

This system includes a full range of destructive and non-destructive testing which is undertaken in-house in our state of the art ISO 17025 accredited laboratory. This ensures our products conform to the relevant standards and that our methods, equipment and quality controls meet the highest standards set by the demanding needs of the Energy markets.

The main scope of the initial accreditation primarily concerns the important tests surrounding:-

- Ambient Temperatures (BS EN ISO 6892-1)
- Impact (BS EN ISO 148-1)
- Stress Rupture BS EN 10291)

Testing Capabilities

We offer an extensive range of testing capabilities including a full range of destructive and non-destructive testing:-

- Full Size Tensile Testing
- Elevated Tensile Testing
- Stress Rupture
- Impact Testing
- Decarburisation
- Hardness Testing
- Proof Load
- P.M.I
- Micro Structure
- Grain Size
- Chemical Analysis
- Mechanical Analysis
- Dye Pen
- Ultrasonic Testing

**Do you have fasteners
or materials that require testing?**

Our laboratory is available for 3rd party use or contract testing.

Unrivalled Quality Control

Quality and continuous improvement are LoneStar Fasteners Europe's priorities. We are committed to providing safe and efficient products that are developed, manufactured and distributed in full compliance with statutory and regulatory requirements and the Group's core values.

We understand that the markets we serve have exacting demands and aim to meet them through high integrity local supply, innovation and traceability. We've developed comprehensive quality systems to serve the Power, Petrochemical, Oil and Gas, Subsea and Renewable Energy industries and the markets they serve. These programmes cover the full scope of our activities and comply with recognised industry standards which include:-

- ISO 9001:2008
- ISO 14001:2004
- ISO 18001:2007
- ISO 17025:2005

Our dedication to precision and quality means that you can depend on the fasteners and precision components LoneStar manufactures and supplies around the world, trusting they will meet your exact specifications, standards and cost requirements.

Documentation and Certification Packages

LoneStar Fasteners Europe can provide our customers with the necessary documentation and certification they require with their fastener and component orders. This includes tailor-made documentation and certification packages to suit individual customer requirements and industry standards.

The following levels of certification are available:-

- Certificate of conformity
- Certificates to BS EN 10204 2.1, 2.2, 3.1
- Independent Inspection to BS EN 10204 3.2
- Inspection bodies LRQA, ABS, DNV, BV
